Analysis of Enrolment Per Disability

- The table above reveals the following:
 - Intellectual disability in its various forms constitutes the majority (just above 50%) of SNE learners in the system.
 - The above statistics underscores the value of Curriculum Differentiation in teaching and assessment for every teacher in the system.
 - Blindness counts among the lowest statistically yet it receives the most attention. This is because it requires a lot of adaptation of materials to enhance accessibility to information.
 - For visual impairment, DBE has adapted Workbooks into Braille and distributed to all schools for the Blind, covering grades 1-6.
