FOREWORD

As we celebrate 20 years of public examinations in South Africa, I am pleased to release the National Senior Certificate (NSC) Schools Subject Report for the Class of 2015. The Class of 2015 entered the education system in 2004 at the onset of our journey into the second decade of free citizenry in South Africa. We value this societal freedom and remain driven by the values of Nelson Mandela of creating a better life and opportunity for all.

The bedrock in the democratic era has been an improving education system committed to the pursuit of quality basic education. Government's strategy of improving the quality of basic education has been articulated in the National Development Plan (NDP), 2030. Improving the quality of education requires careful management and support from all interested parties. The education enterprise is a highly complex activity where the outcome is based on a multiplicity of factors. Hence, the quantification of improvements in the system is an extremely challenging task. The outcome of the NSC is one of the most critical indicators of progress made in the system.

In 2015, there were 12 814 473 learners in ordinary public and independent schools in South Africa, who attended 25 691 schools and were taught by 416 093 educators. The Class of 2015 had 667 925 full-time candidates participating in the NSC Examination, which is the largest enrollment since the inception of democracy. This indicates a higher throughput rate, a challenge which the sector has been dealing with during the last few years.

Although the achievement rate decreased from 75.8% in 2014 to 70,7% in 2015, there has been a significant increase in the number of learners achieving the NSC. This has increased from 403 874 in 2014 to 455 825 learners achieving a NSC pass in 2015 which is an increase of 51 951 learners.

This report focusses on performance of learners in 11 gateway subjects designed to give education managers in the system additional information that would better equip them to plan and provide more appropriate subject level support to learners. This is aligned to the department's current focus of not only looking at pass rates at the national, provincial and district contexts, but also to focus intensively on more in-depth data on performances in individual subjects at each of the schools. This report is also intended to ensure collaboration between schools. Schools that underperform must collaborate with better performing schools and this shared experience will build a stronger professional schooling community and contribute towards improved performance.

An effective and successful school stems from a collective effort of committed stakeholders. I thank parents, teachers, principals, teacher unions, communities, district and provincial officials, and social partners for supporting the Class of 2015. In 2016, we urge schools and their communities to strive for improved quality of teaching and learning. This is the only way to a better life for all.

MRS AM MOTSHEKGA, MP

MINISTER OF BASIC EDUCATION

05 JANUARY 2015

1. INTRODUCTION

This report is part of the department's ongoing initiative to improve the use of the National Senior Certificate results as a tool for school improvement. In this report, the subject results of all schools in the provinces are compiled into a single document, which allows for easy access by all officials that engage with schools, that are based either at the provincial or district level. This report focuses on the 11 key subjects and in order to ensure a comparative analysis, subject performance data for both 2014 and 2015 are included.

Since 2012, the Schools Subject Report has been well-received by provincial and district officials, who considered it a useful tool in providing necessary data to design and support relevant interventions. This report should be read together with the following three reports on the 2015 National Senior Certificate examination published by the Department of Basic Education:

- a) The 2015 National Senior Certificate Examination Report;
- b) National Schools Report that presents the overall school results, per school over the last three years; and
- c) National Diagnostic Report which analyses learner performance in the gateway subjects; identifies areas of poor performance; and recommends appropriate remedial measures in each of the subjects.

Together these four reports provide a holistic evaluation of the NSC.

2. SCOPE OF THE SCHOOLS SUBJECT REPORT

The Schools Subject Report provides performance data on the 11 key subjects: Accounting, Agricultural Sciences, Business Studies, Economics, English First Additional Language (FAL), Geography, History, Life Sciences, Mathematical Literacy, Mathematics and Physical Sciences.

Candidates' performance in the key subjects at a national level over the last four years precedes the summary table of candidates' performance by district in these subjects in this report. The report provides the candidates' performance per subject, per individual school, within each district, so that every school will be able to evaluate their performance in the specific subject in 2014 and 2015.

3. UTILISATION OF THE SCHOOLS SUBJECT REPORT

This report will be used by school managers, subject advisors, curriculum specialists and district planners to analyze the performance of a school, cluster, circuit or district at a subject level. The Schools Performance Report provides the overall performance of the school, and with this report the performance at the subject level becomes apparent. This report helps with the identification of subjects where performance is poor and appropriate intervention can be planned accordingly.

The schools subject data also provides the opportunity for school managers, subject advisors and curriculum planners to delve beneath the surface and identify any patterns of correlation in learner-performance across the key subjects. Schools that perform well in one subject should also perform at an equivalent level in other subjects e.g. Mathematics and Physical Science. Where there is a lack of correlation between related subjects, further investigations must be carried out by subject advisors to establish the reason for this non-alignment of performance. This may quite often point to competency levels of teachers, difference in the cohort of learners, or other resource limitations. The overall school performance results usually masks the performance of the teachers, and individual teachers could escape from the accountability chain. With the Schools Subject Report, accountability is re-instated to the teacher.

4. SUMMARY OF CANDIDATES PERFORMANCE IN KEY SUBJECTS

4.1 NATIONAL PERFORMANCE IN 11 KEY SUBJECTS: 2012-2015
